

# HAY STRETCHER LARGE PELS

Horse (E 494)

## PRODUCT DESCRIPTION

Hay Stretcher is a pellet with a nutritional profile similar to grass hay, but slightly lower in fiber and higher in energy. It may be used to replace up to half the hay in an animal's diet on a pound-for-pound basis. It is suitable for horses, and other non-ruminants. Hay Stretcher is not fortified with vitamins or trace minerals and should not be used to replace grain in an animal's diet.

## FEATURES AND BENEFITS

### Fixed-Components Formula

Nutritional content and guaranteed analysis consistent with every bag, unlike the variability found in hay.

### Large Pelleted Form (#494)

The large pellet form slows consumption and promotes chewing and saliva production, thus reducing the potential for digestive upsets. The large form also helps prevent waste and is easy to handle.

### High Fiber/Low Starch

Hay Stretcher can be fed when hay quality is poor or when supplies are limited. Hay Stretcher can also be fed along with a grain ration when additional fiber and lower starch content is desired to help promote good digestive flow and function.

### High Palatability

Horses eat it readily.

### Less Dust Than Hay

Reduces dust and mold exposure to horses; especially beneficial for horses with allergies to hay.

## FEEDING DIRECTIONS

BLUE SEAL HAY STRETCHER LARGE PELLETTED HAY EXTENDER is designed specifically to be fed to horses and other non-ruminants.

HAY STRETCHER LARGE PELLETS may be used to replace up to half of the hay in an animal's diet on a pound-for-pound basis (i.e. one pound of HAY STRETCHER LARGE PELLETS substitutes for one pound of hay).

NOT TO BE USED SOLELY AS A COMPLETE FEED

## HAY STRETCHER LARGE PELS

For horses and other non-ruminants.
