

OVERVIEW OF DICO PRODUCTS

Quality - Our products are the same products manufactured for the largest industrial end users. DICO products manufacture the highest quality finishing products in the retail market.

American Made - Our corporate office and manufacturing facility has been located in Utica, NY since 1892. We are the largest manufacturer of finishing products in the United States.

Full time Sales and Technical Staff – Feel free to call us for technical questions at (315)797-9088.

Proven Sales History – People who use our products return for our products again and again. Our products create Brand Loyalty.

Name Recognition – Dico & Divine Brothers are recognized names in the Polishing Industry for over 120 years.

Retail Packaging – Items are packaged in brand recognized and consistent packages. UPC and product codes are on the UPC label.

PRODUCTS:

- **Buffing Wheels:** 100% Cotton cloth for consistent performance. Tight looped orange stitching for longer life with less potential for separation of layers. Combed for easier compound application. **All buffs must be used with a compound.**
 - **Spiral sewn:** Used for coarse cutting action. Orange stitching is in a spiral pattern, ¼” spaced between the rows of stitching, beginning at the arbor hole. Available in 4”, 6”, 8” and 10” diameters and 4” mandrel-mounted wheels, generally ½” thick.
 - **Cushion sewn:** Used for light cutting and polishing. Available in 4”, 6”, 8” and 10” diameters and 4” Mandrel-mounted wheels. This wheel provides a resilient, cushioned effect when in use. These wheels are held together by concentric circles of orange sewing. Generally, ½” thick.
 - **Flannel:** Used for final polishing and for precious metals. Available in 4”, 6”, 8” and 10” diameters and 4” mandrel mounted wheel. This wheel is recommended for all final coloring operations.

- **Compounds:** Our compounds are made with high grade minerals, contain no fillers and have a high percentage of quality abrasive. This provides the best results the first time. Each compound is conveniently color coded and is specifically formulated to produce superior results for specific applications. Now available in clam packs!
 - **Emery** – E5 (black) – This compound is very aggressive, resembling that of a flexible grinding wheel. With coarse buffing, it can remove scratches, rust, corrosion and burrs from iron, steel and other hard metals.
 - **Tripoli** – TC6 (brown) – A Natural Abrasive that removes surface imperfections from all base metals and plastics. Used for general cutting and preliminary coloring operations. This is a good compound for brass, copper and aluminum.
 - **Stainless** – SCR (gray) – A general purpose composition used to restore the natural luster of ferrous metals. This is good for cutting down and coloring stainless and other steels, chromium, & nickel. Provides fast cutting action and good coloring.
 - **Plastic** – PBC (blue) – This is excellent for edge finishing of acrylic sheeting. Restores a clean finish to solid plastics. It will provide mild cutting and good coloring action on plastics.
 - **White Rouge** – WR1 (white) – This rouge will not discolor, is clean and greaseless. Restores a natural luster to non-ferrous metals such as aluminum. Also can be used on plastics. Produces a brilliant high-gloss finish.
 - **Green Rouge** – GRN (green) – This compound brilliantly finishes all metals, particularly ferrous metals and is excellent for honing. The best and safest use of this compound would be with a Flannel buff. Excellent for final coloring of any material.
 - **Jewelers Rouge** – JR1 (red) –A premium composition for the finest finish on gold, silver, and other precious metals. Skillful buffing with a flannel buff will bring out the beauty of any metal.

- Nyalox:** The original abrasive nylon brushes. Available in three color coded grits: gray is 80 grit, orange is 120 grit and blue is 240 grit. Aluminum oxide is infused throughout the entire bristle. Maintains shape, will not rust, does not shed bristles, safer to use than wire brushes and will not puncture skin. Lasts up to 10X longer than traditional wire brushes. 1/4" Mandrel mounted or now available with 5/8-11 thread for angle grinders.
