

Gilmour®

where your garden grows

2013
Product Guide

The Gilmour Experience

Gilmour brand exists to meet the needs of gardeners and home owners who demand the very best for their lawns and gardens. With its combined 350 years of lawn and garden service, Gilmour is proud of its heritage rooted in quality, innovation, and value. The brand is committed to remaining the leading water and gardening producer through continuous improvement in these areas

Gilmour is committed to environmental excellence by offering products that are environmentally friendly and supported by responsible manufacturing. All Gilmour products strive to be in compliance with global standards of sustainability.

Encouraging joyful gardening, Gilmour offers its consumers user-friendly and meaningfully designed products, no matter the scope of the project.

The NEW Innovation

Evolution in durability and comfort

Gilmour **Master Series™** nozzles elevate the consumer experience with a combination of durability and comfort features. **Master Series™** nozzles improve quality through the use of sturdy zinc and high quality polymers. Soft grip handle and ergonomic design provide comfort in use. The durable metal tip is adjustable for controlled spray pressure.

Product Information

- Zinc body and handle for added durability
- Flow control regulates force of water stream
- Comfort grip over-mold for comfort during extended use
- Ergonomic handle provides a perfect fit in the hand
- Zinc coupling for superior resistance to galvanic corrosion (vs. aluminum)
- Adjustable metal tip alters the water stream for multiple watering/cleaning needs

The NEW Innovation

Inspired by professional power

Inspired by professional power washers, the NEW Gilmour **Power Jet Wand** was designed with cleaning in mind. The innovative design focuses on quality and control. The Gilmour **Power Jet Wand** tackles tough outdoor cleaning tasks with comfort and ease.

Product Information

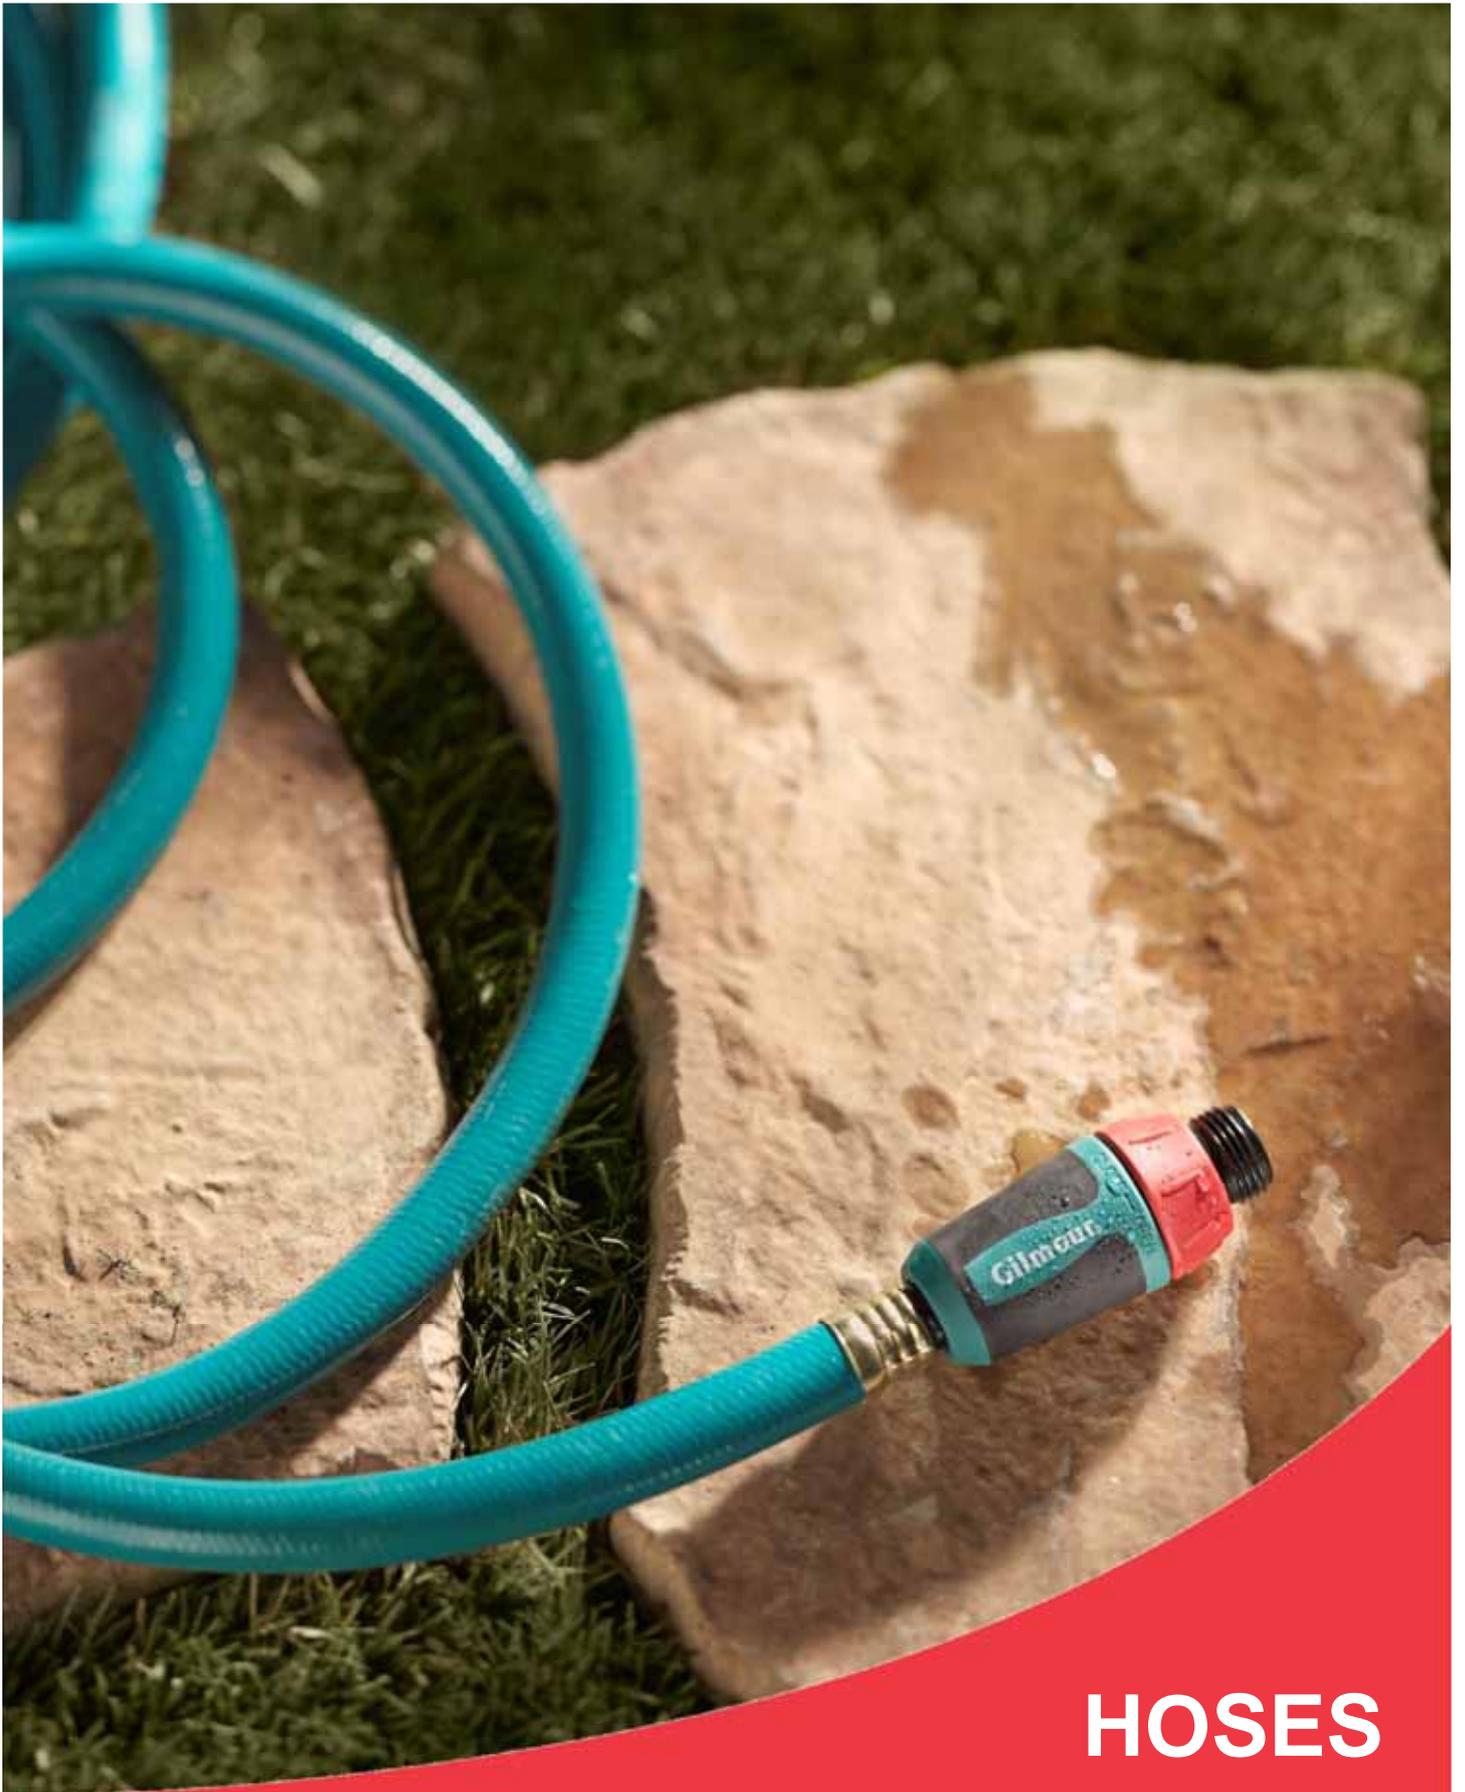

- Power jet spray tip delivers a focused jet spray to tackle outdoor cleaning tasks
- Stabilizing grip for added control during cleaning applications
- Solid metal body for added durability and quality
- Flow control regulates force of water stream
- Ergonomic handle provides a perfect fit in the hand
- Zinc coupling for superior resistance to galvanic corrosion (vs. aluminum)
- Metal trigger for added durability
- Metal loop enclosure prevents accidental discharge
- Aluminum tube

HOSES

8 PLY FLEXOGEN

Gilmour Flexogen™ has long been regarded by the industry as a gold standard for quality and durability. With its 8-ply, polyester cord reinforcement and high burst-strength construction of 500 PSI, this hose is built to last. The Flexogen™ Advantage construction provides superior flexibility and kink-resistance. The Flow Guard Plus protective collar helps resist kinks at faucet, while the crush-resistant Full-Flo machined metal couplings provide a durable and tight seal. Flexogen™ hose features polished surface treatment for superior resistance to dirt-collecting abrasions. Made in the USA and backed by a lifetime guarantee, Flexogen™ is indeed “The Last Hose You’ll Ever Buy”.

HEAVY DUTY (5 PLY)

Superior strength and durability are at heart of Gilmour heavy-duty hose. With its 5-ply, vinyl reinforcement and its high burst strength of 475 PSI, this hose is built to last. The Flexogen™ Advantage construction delivers flexibility and kink resistance. The protective collar helps resist kinks at faucet, while the crush-resistant Full-Flo machined metal couplings provide a durable and tight seal. Gilmour heavy-duty hose features an EZ-On coupler for easy faucet connection. The hose has a polished surface treatment for superior resistance to dirt-collecting abrasions.

MEDIUM DUTY (4 PLY)

Gilmour medium-duty hose is lightweight yet durable with its 4-ply construction and vinyl reinforcement. The Flexogen™ Advantage construction delivers flexibility and kink resistance, while the crush-resistant Full-Flo machined metal couplings provide a durable and tight seal. The hose features polished surface treatment for superior resistance to dirt-collecting abrasions.

WEEPER/SOAKER

Unique construction provides gentle, even and efficient watering as the water “weeps” through thousands of pores. These reduce evaporation and waste of water by slowly weeping through the whole length of the hose. Lightweight and flexible, these hoses are ideal for watering new plantings, shrubs, bushes and raised garden beds.

SPECIALTY

Gilmour marine & recreation hose is ideal for use during boating, camping, and other leisure activities. Its liner material complies with FDA standards and ensures no impurities are imparted to water, making it safe for drinking. The 5-ply construction makes it abrasion resistant and virtually impervious to bursting. It is kink resistant, flexible, and easy to coil in all weather conditions, and the blue-striped white cover will not mar surfaces. Nickel-plated couplings allow for unrestricted water flow, while the EZ-On coupler makes for quick attachment to the water source.

INSULATED & COMFORT GRIPS

Quality-built Gilmour nozzles are designed to handle the toughest cleaning jobs. With heavy-duty construction, the insulated grip models withstand hot water and deliver high pressure water levels, while protecting the user's hands from excessive temperatures. The comfort grip models provide ease of handling during extended use.

OSCILLATING SPRINKLERS

Versatile and efficient, Gilmour oscillating sprinklers are ideal for watering medium-sized areas. The product line features easy-to-adjust settings for precision or width control. Proprietary AquaDrive™ motor provides Gilmour oscillating sprinklers with superior performance and durability.

AquaDrive™ uses an innovative water-powered switching mechanism to reverse the direction of the spray tube more quickly, eliminating lag, and saving water. With fewer parts and larger gears, the AquaDrive™ also tolerates particle contaminants better and lasts up to three times as long as the planetary gear drive in typical oscillators.

TURBINE ROTOR SPRINKLERS

Turbine rotor sprinklers are equipped with a water-driven motor for quiet, long-lasting performance. The sprinklers provide full or partial circular coverage up to 70 ft. diameter. Multi-stream nozzle provides even coverage, while distance control knob controls the flow. All Gilmour turbine rotors feature impact-resistant, rust-proof polymer construction with three different types of base.

MY DESIGN SPRINKLER KIT

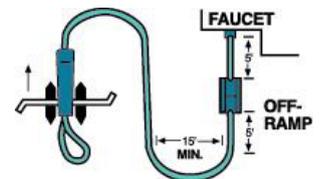

Water conservation is at heart of Gilmour My Design Sprinkler Kits. The kits equip consumers with all the right components to save money and time on watering, while providing better results. Gilmour My Design Sprinkler Kit is a much-needed alternative to intimidating and complicated sprinkler sets. The kit set-up has three easy steps - (1) attach hose and valve to faucet, (2) roll out hose to area to be watered, (3) attach sprinkler. Continue steps 2 & 3 as needed. Parts are reusable and can be repositioned as plants are moved.

PRUNING TOOLS

HAND PRUNERS

Gilmour hand pruners are the right choice for multiple gardening activities. Hand pruners with a bypass blade design are ideal for new growth or green wood, providing a close clean cut. Anvil blade design features a flat surface, distributing the cutting force and keeping blade from twisting. It works best on dry, hard-to-cut wood. Gilmour hand pruners are constructed with premium steel for lasting quality, while being lightweight for handling comfort.

HEDGE & GRASS SHEARS

Innovative features and designs are at heart of Gilmour Snap-Cut grass shears. In 1964 Snap-Cut introduced the first vertical blade grass shear. This innovative design allows a vertical blade to sweep across the bed knife blade for an efficient slice-cut action. In addition, Gilmour Snap-Cut grass shears feature automatic blade tension for precise and clean cutting.

PROFESSIONAL SAWS

Gilmour professional hand saws are ideal for cutting small to medium branches. The straight blades are best for horizontal cuts, while the curved blades perform the best at vertical cuts close to tree collar. Made with premium steel, Gilmour professional saws are extremely durable, while a well-designed grip makes them comfortable and easy to handle.
