Professional protection for all painting, construction and remodeling jobs

### Self-Adhering Masking Film

GripNGuard is a new, multi-layer high-density polyethylene film specially designed for painting, construction, remodeling and home improvement projects.

### ADVANCED 3-LAYER FORMULA

GripNGuard clings to virtually any surface with minimal or no taping required. The outer surface of GripNGuard has been tested to retain dust 3 ½ times better than most plastic drop cloths. Dust, paint, sawdust and other airborne particles cling to the GripNGuard surface and are not reintroduced to the area during repositioning or cleanup. That means less clean up time, lower costs and higher profits.

Grip-N-Guard's sturdy case and cored roll allow for easy dispensing.
