THE NEW AMERICAN LAWN FEED YOUR LAWN ...AND YOUR SOIL!

THE ONLY ANNUAL LAWN PROGRAM THAT DOES BOTH!

The NEW AMERICAN LAWN outlines a new, SOIL approach to lawn care that focuses on three key factors that are overlooked by traditional lawn programs – genetically superior grass seed, balanced soil pH, and biologically healthy soil.

Always start seeding projects with top quality grass seed...and there is nothing better than BLACK BEAUTY! Black Beauty exhibits roots that can grow up to 4' deep, dark-green color, and great insect and disease resistance. That's why it's used by leading sod growers across the U.S.A.!

MAG-I-CAL corrects your soil chemistry by balancing it's pH so nutrients from lawn fertilizers aren't wasted and weed problems are reduced.

LOVE YOUR SOIL helps develop a healthy, biologically active soil. LOVE YOUR SOIL helps reduce soil compaction so roots grow deeper and helps release "idle" nutrients in the soil providing the thicker lawn you've always wanted.

Only the best lawn results, that's "The New American Lawn" way!

DIRECTIONS

Remove dead grass with a rake and loosen soil. Some settling may occur during shipment, turn unopened bag upside down and shake prior to use. Sprinkle Lawn Repair on bare ground evenly. Water area twice daily for one to two weeks. Then water once a week, or as needed. Water if the mulch dries out and turns grey. New grass should start to emerge in 10 - 14 days. Seed germinates best when daytime temperatures are between 60°F and 80°F.
