- Battery operated...no plugs or wires

LIGHT IT!™

**LIGHT IT!** It's simple with us. Our products use refined and straightforward technology to make lighting easy. All of our lights are fitted with Light Emitting Diodes (LEDs) and special lenses. LEDs shed a bright, focused beam of light, and last 100,000 hours. The lenses in our lights are carefully cut to diffuse this light into a broad, balanced beam which is clear, bright, and easy on the eyes. Together, these two elements create more light than a conventional lightbulb, and with 1000% more efficient use of energy.

All of our lights are designed around this simple combination. These lights come in a variety of shapes and sizes, all of which are portable and battery-powered – no need for wires and plugs. The simplicity and economy of their construction makes them a quick, versatile, and scalable solution to any lighting problem.

These products have made us top industry sellers of all kinds of lighting solutions, from indoor to outdoor, focused to floodlight, decorative to utilitarian, and visibility to security. Read this catalog to see how we can help meet your specific needs.

**6-LED Wireless Motion Activated Porch Light**  
Weatherproof • Adjustable • 5 Minute Installation • 42 Lumens • 4 C Batteries

This porch light became one of our best-selling products after it was featured on Good Morning America for its simplicity, elegance and effectiveness. It includes a motion sensor which triggers a vibrant, glare-free beam of light. It is simple to install, and its head rotates. It also comes in four colors, making it easy to harmonize with home design and finishes

### 6-LED Motion Activated Path Light

Weatherproof • Outdoor/Indoor • Easy Installation • 48 Lumens • 4 AA Batteries

This light throws a bright, focused beam. Its motion sensors illuminate walking paths in sharp relief. It is easy to install almost anywhere, and it detaches from its mounting to serve as a handheld light. Outdoors, it could light pathways, stairs, decks, patios, driveways, sheds, and signage. Indoors, it is useful for illuminating hallways, closets, and storage areas.

### Wireless Remote Control Lighting System

RF Technology works through walls  
Easy Installation • Add more lights to  
same remote switch • 35 Lumens  
3 AA / 2 CR-2032 batteries

These lights are operated by a wireless remote switch which functions up to 60 feet away, and its signal goes through walls. Up to 20 lights can be programmed to operate from one remote. It is also possible to program four independent circuits with multiple switches. A dimmer is included, and the lights automatically turn off to save energy.
