SA10029	18" Replacement Roller	1	1.64	\$85.58

High Viscosity Mixers

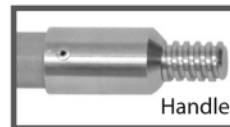

- These mixers are used by those in the decorative concrete, stamping and terrazzo markets.
- The "football-shaped" cage configurations are ideal for mixing more viscous overlayerment, impregnated and cementitious materials.
- The larger 10"x 6" head is designed for barrel mixing.
- The smaller 6"x 4" head is ideal for 5 gallon quantities. Both mixers effectively remove air without splash-out.
- Both have an overall length of 26" with a hex shaft.

Prod. No.	Description	Order Mult.	Weight	Unit Cost
47422	Small 5 gallon mixer	1	1.2	\$14.40
47425	Large mixer	1	1.4	\$14.13

High Performance Roller Frame

- These exclusive "heaviest duty" roller frames designed for use with high performance floor coatings come with threaded handle adapters and can be used with any roller cover but **requires 3/8" holed end caps** sold below. We are also offering the 24" prograde roller cover which work well with our larger frame.
- Available in widths of 18" and 24". **Special 3/8" post hole end caps are required for use with these exclusive frames.**

NOTE: This is the same frame used with our Spiked Rollers

Cant Hook - A tool for the logging industry. Used to easily roll logs. Dixie Industries, a Division of Columbus McKinnon Corp., manufactures cant hooks from the highest quality materials available. Handles are top quality white mountain hickory or rock maple hardwoods air dried to 18% moisture content, then precision cut to an exact fit. Duckbill hooks are drop-forged with the bills ground to a fine point. Clasps and extension toe rings are ductile iron castings for long lasting service. Replacement handle is drop shipment item No. 06142.

OUTDOOR/AGRICULTURE

Peavie - A tool for the logging industry. Many uses include ease of rolling logs. Dixie Industries, a Division of Columbus McKinnon Corp., manufactures peavies for the professional logger. Featuring handles turned from select white mountain hickory or rock maple, air dried to 18% moisture content, then precision fitted with the finest tool available to the industry. Duckbill hooks are drop-forged high carbon steel with the bill ground to a fine point. Our most popular style peavie, the solid steel socket style, features a drawn carbon steel socket, and a pick forged from high carbon steel before being solidly driven into the handle. The socket is held securely in place with a special retaining tab forged into the pick, a Columbus McKinnon exclusive.

Timber Carrier - Turn handles from a pattern providing precise size and weight. Duckbill hooks are of 1-piece drop-forged steel construction and ground to a fine point. Ductile iron cast clasp provides higher strength. Clasp is open at top and drawn tight by a bolt, eliminating the need for a bolt hole through the handle. Heavy steel swivel allows free movement, permitting timber passage through narrow areas. Finished product is designed to handle logs from 3" to 16" in diameter. Handles are turned in a 2-1/2' diameter in four 4-1/2' lengths of white mountain hickory or rock maple, air dried to 18% moisture content. Replacement parts are available.

Sprinkler Timer - Water conserving dual programs for 2 separate watering schedules. Simple to program. Choose between 6 preprogrammed schedules or customize your own specific days or interval day scheduling. Automatically waters up to 3 start times daily for up to 2 hours per station. Easy to read display and pump start capability but not included. Rain shutoff and winterizing mode which allow for shutdown of system without losing programs. Battery backup, and fail-safe program defaults to a backup schedule in case of battery failure. Manual start begins station watering of either full cycle or individual chosen stations without interfering with normal programming. Test mode automatically runs a 2 minute test of each station to check for needed adjustments. Easy to install with 24V AC plug in transformer. Compatible with most 24V AC automatic valves. Not designed to be mounted outdoors. 4 station, single program.

Irrigation System Timer - The complete irrigation system manager for up to 9 valves (watering stations), the ISM timer is remarkably easy-to-program while offering advanced features for precise watering control. Common schedules can be programmed with 1-touch convenience. More sophisticated programming can be done quickly and simply by following on-screen prompts at each point of the dial. Other timer engineering advances include water-saving Rain Sensor and Seasonal Adjust™ features, fuseless surge protection plus 3 independent programs to manage watering needs for multiple planting areas. Each timer is constructed with top quality, professional grade components. Among the most user friendly timers, all ISM models include simple instructions with quick reference guide and programming chart for extra convenience. Features include: 3 easy-set programs independently control watering parameters for different lawn areas, planting beds, and drip irrigation systems. Guard against damage from power surges. Pre-programmed schedules. Easily increase or decrease the amount of water applied by season without changing programs. Fuse-less surge protection, no fuses to replace. Dimensions: 7" W. x 6" H. x 1-1/4" D.

Ultrasonic Pest Repeller - PestChaser® is a high-quality USA designed and engineered product with solid state components. PestChasers® broadcast intense jackhammer-like sounds in a pulsing, 32 to 62 kilohertz swept frequency that can't be heard by humans or nonrodent pets. This creates an acoustically stressful environment. Mice, rats, and some other pest species can hear or sense this. 1.9 to 2.5 watts power use 110V. Direct plug-in. PestChaser can cover an unobstructed room up to 400 sq. ft. Coverage of multiple rooms will require multiple units. On a hang-up card. *Caution:* PestChaser® must never be used around rodent pets such as mice, gerbils, hamsters, guinea pigs, or rabbits.

Weed-Shield® Landscape Fabric - Gardeneer label. Highly effective material guaranteed to stop weeds for 5 years. Ideal for home landscaping and gardens. The highly-porous fabric lets water and air through, keeps weeds out. Conserves soil moisture without souring the soil. This reduces compaction and cuts the need for watering. Fabric is stabilized to withstand ultraviolet light.

Warren Oil Co. Inc.

Do it Best™ Bar and Chain Oil - Do it Best™ bar and chain oil is designed to prevent rusting and reduce wear and linkage breakage thus extending bar and chain life. Penetration into rivet holes and the bar channel is assured. Designed especially for lubrication of bar and chain saws and open or enclosed chains on motorcycles, snowmobiles, and lawn and garden equipment. Additional benefits include high load carrying capacity minimizing wear of bar and chain, reduced *throw off* and heat build up, and rust and corrosion protection.

TARPS

Gosport Mfg.

Do it Best™ Tarpaulin - Tough cotton canvas woven to high-quality specifications. Closely woven heavy yarn construction.

Mildew and water-resistant. Carefully controlled for maximum effectiveness. 1-1/2" to 2" rope reinforced hems are folded over and securely stitched on all 4 sides making a strong framework around the entire perimeter of tarpaulin, absorbing most of the strain that normally would be put on the canvas.

Rustproof grommets are set through the double hem approximately 3' to 4' apart between corners. Your biggest selling weight. Suitable for general purpose cover use, covering machinery, farm and other equipment, small boat covers, etc. Color: Brown. 10 oz.

NOTE: All tarpaulins 12' x 14' and larger will be equipped with a poly rope in hem.

Dynatech International

Do it Best™ Heavy-Duty Silver Poly Tarpaulin - Tarps are constructed of one 14 x 14 woven mat of polyethylene and laminated on both sides. A polypropylene rope is heat sealed into the peripheral hem. Durable, weatherproof poly carbonate grommets are located every 3' around the periphery. Corners are reinforced with molded plastic. Treated to withstand the ultraviolet rays of the sun. Available in silver and packaged in a PVC bag with a hang tab and a sample swatch.

Film Gard Clear Reinforced Poly Sheeting - Film Gard reinforced consists of 2 sheets of high-strength polyethylene film laminated together with a third layer of molten polyethylene. A heavy polyester scrim reinforcement placed between these plies greatly enhances tear resistance and increases service life. Film Gard's heavy-duty diamond reinforcement responds to tear immediately by surrounding and stopping the tear. Suggested applications: Construction enclosures, vapier barrier, temporary liners or covers, erosion control, shipping and packaging, insulation membranes, asbestos abatement, fumigation cover, and temporary walls.

OUTDOOR/AGRICULTURE

GTO, Inc.

Heavy-Duty Single Gate Opener - For single swing gates up to 18' long or up to 850 lb. Ideal for farm, ranch, and residential gates. Heavy-duty commercial grade unit that is easy-to-install. Has *soft start* and *soft stop* that extends the life of the gate hardware and gate opener. Large control box that is prewired for an optional second battery. (Recommended to use a second battery for solar applications.) Installation video and detailed manual included. Works on all types of gates: chain link, tube panel, ornamental, wood, and vinyl. Provides up to 225 cycles per day, using the transformer charger (included). Adjustable gate activation alert and auto-close. Easy single button programming. Includes 12V battery backup to activate the gate even during power outage. Designed for gates that open into or out from the property. UL approved.
