

The original SEGAL lock was developed in 1912 by Samuel Segal, a New York police officer, who saw the need to protect residents from thieves "jimmying" or spreading the door frame to gain entry. Improvements over the years have changed the original design and made the Segal Vertical Deadbolt one of the strongest locking devices available through the retail channels.

SEGAL

...the Symbol of Protection

See pages 2-3 for the new mortise lockset products

Customer Review

Good fit and finish. The lock is exactly the same size as it's predecessor and the satin nickel finish of our other hardware is close enough of a match....

Customer Review

Works great, good quality and construction. Good value for the price. Easy to install....

DOUBLE CYLINDER DEADBOLT

Customer Review

Well-made, functional, durable, does what it is supposed to do. I have used these locks for years, they are sturdy and work very well, need little or no maintenance, and allow for some shift in wood and brick.

WINDOW GUARDS

- Child-safe 3-7/8" bar spacing, inside mount
- Telescoping tubular bar design adjusts to fit a wide variety of window openings
- Approved by the New York City Department of Health and Mental Hygiene, HDWG #04-09-2010
- Quick release feature for fast window guard removal in emergencies with distinct 3-step removal procedure to discourage toddlers (egress version only)
- Tamper resistant screws to keep window guard firmly attached
- Easy to install
- U.S. Patent No. 8443550

Customer Review

A definite buy for piece of mind. Awesome! I bought two other window guards and this is the best so far. This costs just a couple bucks more than the others but it's totally worth it. They're strong, sturdy, and painted good....

REPLACEMENT CYLINDERS

- Solid brass or zinc construction with brushed brass or a brushed chrome finish.
- Each cylinder consists of: Cylinder, 2 keys, screw pack, mounting plate and instructions.
