

The WOOSTER BRUSH Company

has been manufacturing innovative, high-performance painting tools right out of Wooster, Ohio USA since 1851. Our primary factory and headquarters have been located in the city of Wooster for our entire history.

Company founder Adam Foss traveled from Pennsylvania to Ohio to set up shop. He began producing handmade bristle paintbrushes from a small, two-story building on Wooster's main square, and then sold the brushes door-to-door throughout the state.

Over 160 years later, the company has grown to 888,000 square feet of manufacturing, shipping, administrative, and warehousing facilities. We have 500 employees with an average of 18 years of service each, all dedicated to providing the best performance and value in paint applicators on the market today.

The Wooster Brush Company offers more than 2,000 products for painters of all skill levels. Wooster brand names include Alpha™, Ultra/Pro®, Yachtsman®, and Shortcut® paintbrushes; Super/Fab®, Pro/Doo-Z®, and Super Doo-Z® roller covers; Sherlock® frames and extension poles; the Jumbo-Koter® miniroller system; and Prep Crew® surface prep tools. No other supplier produces as many top-selling brands. You can feel confident knowing Wooster is the name behind your painting tools.

BRUSH COMPONENTS

Filament

The working end of the brush, made with synthetic or natural bristle materials.

Ferrule

Metal band that holds the filament and handle together. Attached by nailing or crimping.

Handle

Made of wood, plastic, or other synthetic materials. Provides comfort and good balance.

Spacer

Small wood, plastic, or cardboard strip that creates a reservoir to carry paint.

Epoxy

Type of cement or adhesive that locks filaments or bristles in place.

Painter's Tip

Never use the same brush in both oil- and water-based paints, because it gums up. Keep two sets of brushes—one for oils, the other for acrylics—to make cleaning faster and increase the life of the brush.

HANDLE STYLES

Sash Long, thin handles in regular, rattail, and pencil styles provide extra control.	Shortcut® Compact handle, less than 4 1/4" long, made of Shergrip® elastomeric material, for comfort and control, even in tight spaces.	Varnish Medium, contoured "beavertail" handles are designed for a comfortable feel.	Dowel Round, thin, pencil-style varnish handles make the brush easy to rotate and direct.	Shasta® Unique "diamond cut" handle end with a thicker shoulder just above the ferrule. Shaped to balance a 25/32" thick brush.	Wall Large, thick beavertail style allows a good, firm grip and balances a large brush head.

ROLLER COVER PARTS

Fabric

Synthetic or natural fibers attached to a backing. Holds then releases paint to the surface.

Adhesive

Substance that bonds the fabric to the roller core.

Core

Base of the roller cover, most often made of plastic or phenolic-treated cardboard.

Painter's Tip

For the best results, after you roll and get even coverage, finish with light, vertical, full-length strokes—painting down only—over each section. It will give you the smoothest finish.

It's quite possible that no other company manufactures more paintbrushes than Wooster.

From Alpha™ to Ultra/Pro®, synthetic or natural bristle, thin angle sash to wall, 1-inch to 6-inch...when it comes to brushes, is there any other company that offers as many brands, styles, and sizes? That's what over 160 years of experience will do for you. If a painter wants it, Wooster has it. You'll find them all here, described in detail and ready for the job.

Q. What is the difference between “sash” brushes?

A. The **angle sash** is by far the most common. It features a 14-degree end that adds control while edging, especially on vertical surfaces like around windows or doors. The **thin angle sash** has a narrower and lighter angled head than the angle sash. It adds precision for lines and small areas. The **flat sash** is designed with a straight end, which is especially useful for baseboards, mouldings, or horizontal surfaces. All sash brushes have long, thin handles that are easy to turn, provide balance, and allow extra reach. The choice between styles is a matter of personal preference.

Best of Both Worlds

First introduced by Wooster, the “angle varnish” or “angle wall” brush style combines angle sash control with varnish or wall brush capacity. Painters request these tools for general cut-in and trim as well as for quickly covering enclosed areas such as cabinets. Angle varnish and angle wall brushes have a 14-degree working edge with an angled ferrule like the angle sash, and the same types of handles as their varnish- or wall-style counterparts for a good, firm grip.

Professional Brushes

Angle Brushes, Synthetic 3-6
 Angle Brushes, China Bristle..... 7-8
 Flat Sash, Synthetic 9-10
 Flat Sash, China Bristle 10

Style Code

Angle Sash = AS	Angle Varnish = AV
Thin Angle Sash = TAS	Angle Wall = AW
Flat Sash = FS	

Making the Grade: Filament Facts

Synthetic brushes made with nylon, polyester, and other filaments can be used with all types of paint, and are especially recommended for water-based coatings (latex, acrylics, water-based wood finishes). They perform well while painting smooth to rough surfaces in any weather, even heat and humidity.

FILAMENT	GRADE	CHARACTERISTICS
Nylon 	A 	Very durable, resists wear on rough surfaces. Lasts 5 times longer than bristle, 2 times longer than polyester. Tips very precisely for a smooth, professional finish. Cleans completely and easily. Softens in hot weather or prolonged use in latex paint.
NylonPlus™ 	A+ 	All the positive qualities of nylon, plus more stiffness. Exclusively from Wooster in Ultra/Pro® Extra-Firm brushes. Solid and tapered with a unique shape for added durability. Maintains stiffness in heat and humidity, excellent control.
DuPont™ Chinex® 	A+ 	Maintains stiffness for control, resists heat and humidity. Lasts 7 times longer than natural bristle. Perfect balance of paint pickup and release. Cleans completely and easily.
Nylon/ Polyester 	A- 	Combines positive qualities of nylon and polyester. Polyester used in short lengths to add stiffness and control. Nylon used in long lengths for precise tipping, smooth finish. Depending on the polyester content, takes some time to clean.
CT™ Polyester 	B+ 	Chemically tipped for excellent leveling and smoothing ability. Thin, soft filaments virtually eliminate brushmarks. Does not carry or release a lot of paint, less production. Takes some time to clean.
Polyester 	C 	Does not absorb water, resists heat and softening. Lasts 2½ times longer than natural bristle. Can't be precisely tipped, tends to leave brushmarks. Difficult to clean.

Test for Taper: See It & Feel It

Tapered filament helps paint flow for better coverage. It “pumps the paint” out and down to the surface. It also gives shape to the brush for precise cutting-in. Look at the brush edgewise. If it comes to a point, it has taper and will provide more control. Untapered or level filament reduces the price of the brush, but it also sacrifices capacity, coverage, and control. It won't release paint like tapered filament. If the thickness of a brush feels the same from base to tip, it is untapered. It lacks the performance of a brush with tapered filaments.

History of the Lindbeck® Name

Wooster was the first company on the record books to manufacture the angle sash brush style! Lindbeck is the registered name applied to many Wooster angled brushes. The trademark, established in October 1937, was named for its originator, H. T. Lindbeck. Mr. Lindbeck was a painting contractor and author, well-known throughout the trade, who conducted field tests for Wooster for many years.

Alpha™ AS #4231

Making the Grade: Bristle Facts

Natural bristle is the best choice for oil-based coatings: oil paints, varnishes, shellac, alkyd enamels, oil stains, and oil-based polyurethanes. The highest quality comes from mainland China. It has the softest natural tipping and flexibility, providing the smoothest finish with virtually no brushmarks.

BRISTLE	GRADE	CHARACTERISTICS
Bristle/ Nylon 	A- 	Combines positive qualities of nylon and bristle. Bristle provides a super-smooth finish and fluid glide. Nylon adds durability and improves cleanup. Can be used in all paints, but performs best in oil-based coatings or high-grade acrylics.
Black Bristle 	B 	Slightly stiffer than white bristle. Thicker flags on the tips than white bristle. Excellent for high productivity or exterior applications.
White Bristle 	B 	Softer and more flexible than black bristle. Thinner, feather-like flags on the tips. Excellent for fine finishing or interior applications.
Bristle/ Polyester 	B 	Combines positive qualities of polyester and bristle. Polyester adds durability and stiffness for control. Very smooth finish, but not as polished as bristle alone. Can be used in water-based as well as oil-based coatings.
Gray Bristle 	C 	Cost-effective bristle for DIY and maintenance brushes. Made from an unsorted mixture of black and white bristle. Softer than black bristle, but stiffer than white alone.
Ox Hair 	A 	Natural bristle material obtained from the ears of oxen. Extremely thin, soft, and expensive. Tips come to a natural point (no flag) for super-fine finishing. Always blended with China bristle in standard paintbrushes. Perfect for lacquer, enamels, marine paints, and varnishes.

Did You Know...

Bristle for paintbrushes is a natural byproduct from long-haired hogs raised throughout China. Highest-quality, "grade A" bristle is very difficult for all U.S. brush manufacturers to obtain consistently because bristle is being harvested before it has time to fully mature. Wooster uses only best dressed bristle from reliable sources.

Alpha™ #4233

- Unique synthetic blend featuring Micro Tip™ filaments for the finest finish with all paints
- Firm, full formulation for smooth paint flow and increased production

Everyone deserves high-quality paint applicators.

Wooster tools make the difference. All painters benefit from high-quality brushes and rollers because they provide a more beautiful finish with less effort. The same processes and attention to quality used for Wooster professional products go into our top consumer brands as well! Golden Glo® and Softip®, Shortcut® and Amber Fong®...these brands provide fast, smooth coverage and long-lasting quality.

Made in USA: More Than Just a Label

Do you look at the country of origin on a product to help you make a decision about buying it? The Wooster Brush Company is proud to have a USA labor force, and we want and intend to continue to make our products here in Wooster, Ohio. The know-how and experience of our people add to the credentials of "made in USA." Our business is based on this principle, and hopefully it has value to you. Thank you for caring about the quality and performance of your painting products!

How to load a brush

1. Dip the brush only about halfway into the paint. To avoid dripping and keep the brush from gumming up, do not sink the brush up to its metal ferrule.
2. Let excess paint drip for a moment, then lightly tap both sides of the brush against the interior wall of the can or bucket. Scraping excess paint on the lip of the can is messy and counterproductive because it removes the paint you just loaded into the brush.
3. As you paint, make sure to keep a wet edge, and continue to paint from that point forward. Use long, smooth strokes and refill the brush whenever the paint starts to break up without covering the surface properly.

DIY Brushes

Synthetic	25-26
China Bristle	26
Stain & Sealer Brushes	27
Maintenance & Promotional	28-31
Artist Brushes	31-33

Match the Brush to the Project

Choosing the right brush size is not difficult. Basically, it should be a comfortable width that will “fit” the surface nicely. Larger brushes hold more paint and help you finish faster (less dipping to refill). The angled edge (instead of flat/straight) is a matter of user preference, though an angle sash is particularly effective on vertical surfaces.

BRUSH	SIZE	SURFACE
	3” to 4”	Exterior siding, masonry, decks, fences, stairs, walls, ceilings, doors
	2” to 2½”	Baseboards, cabinets, furniture, mouldings, railings, shutters, gutters
	2” to 2½” angle sash	Window frames, casings, door mouldings, cutting in edges of walls & ceilings
	1” to 1½” angle or flat	Hobbies & crafts, window mullions, tight corners, very detailed areas

History of the Shortcut® Brush

In August 1999, Wooster introduced the award-winning Shortcut brush. Over the years many companies have offered imitations, but none have been able to beat its comfort and control. Painters with carpal tunnel syndrome or arthritis praise the Shortcut brush because it reduces fatigue. The exclusive Shergrip® elastomeric handle is soft, flexible, lightweight, and really fits hands well. Plus the Shortcut holds the same amount of paint as a wood-handled brush of equivalent size!

Painter's Tip

Many people think small brushes are easier to control, but if you select a high-quality brush in a slightly larger size, it paints more precisely than a low-quality brush! Professional tools produce professional results. The job goes much faster—and the finish will be smoother, too. Reduce your effort by choosing a larger high-quality brush, e.g. 2-inch instead of 1½-inch.

Golden Glo® #Q3118

	1/2" Flat	Camel Hair	
	1/2" Flat	Black Bristle	

Proper care greatly extends the life of high-quality brushes. Most painters today do not clean and reuse roller covers, but we've included that topic in case the situation calls for it. Every coating is different—refer to the paint label for the manufacturer's cleaning instructions. These guidelines are for applicators that have been used with water-based paints only. Always clean immediately after use, so it will take much less time and be more effective.

Paintbrushes

Natural bristle brushes should not be cleaned in soap and water. Use only the solvent recommended for thinning the coating to keep the bristles from flaring. For synthetic brushes...

Step 1 Rinse the paint from the brush with warm water while combing out the brush from base to end with our 1831 Painter's Comb™. Concentrate on the inside "heel" of the brush.

Step 2 Add a liberal amount of hand cleaner with pumice to the brush and work it in completely. There are many brands of hand cleaner that will do the job—some are liquid, while others are a thick paste that are scooped out of the container. Hand cleaner that is petroleum or lanolin based will help condition the brush, too. Again, use the comb to separate the filaments and get paint out of the center of the brush.

Step 3 Rinse the brush well, until the water runs clear of all paint and hand cleaner. You may need to add some regular hand soap during this final process for very hard-to-clean primers, paints, and stains. After the final rinse, do one last comb-through to make sure the paint is completely removed from the heel of the brush. Then spin until damp, comb to straighten the brush filaments, and hang to dry.

Painter's Tip

Use masking tape to make brush cleaning easier.

Before use, take 2 inches of blue masking tape and wrap it around the brush ferrule, with the tape also reaching about 1/2 inch onto the filament. The paint still gets down behind the tape in the reservoir of the brush but, because little air gets to it, the heel won't dry as fast. At the end of the job, remove the tape and clean as usual.

Roller Covers

- Scrape out excess paint with a 5-in-1 tool.
- Rinse the roller cover thoroughly with running water.
- Wash with soap and warm water, then rinse. Choose a detergent that contains petroleum distillates for the best results (check the label). Repeat the wash and rinse steps until the water runs clear.
- Spin until damp. To avoid matting of the fabric, stand on end to dry.

No matter what you call them, they're essential.

Sleeves, covers, rollers, refills...there are many different labels, but they all mean a fast, efficient way to paint. Compared to brushes, which made the history books in 1330 B.C. during the times of the Phoenicians, roller covers are fairly new tools for applying paint. Wooster began making them in 1951, and since then we've generated the number-one brands on the market.

Match the Roller to the Surface

The nap or pile height of a roller cover is the length of the fibers that extend from the backing and carry the paint. Basically, for smooth surfaces you use a shorter pile for even application; rough surfaces need a higher pile, so the long fibers can reach into the valleys of the texture. Some painters prefer to "bump up" to a thicker nap for higher production (e.g. 1/2-inch instead of 3/8-inch); select the pile height that still provides the desired finish.

ROLLER	NAP SIZE	SURFACE
	3/16" or 1/4"	Untextured plaster, smooth wood, wallboard, drywall, metal
	3/8" or 1/2"	Most walls & ceilings, lightly textured drywall or wood, paneling, acoustical tile
	3/4" or 1"	Textured plaster or stucco, siding, decks, concrete block
	1 1/4" or 1 1/2"	Heavily textured plaster or stucco, rough wood, brick, corrugated metal

Fabric Facts: Knit vs. Woven

The vast majority of paint rollers are made one of two ways—knitting or weaving—as described below. New to the industry are “shed-resistant knit” fabrics, which combine the strengths of both. Made with the traditional knitting process and unique fiber technology, they provide high production rates with less shed. However, a true woven fabric will still provide a finer finish than a shed-resistant knit.

Knit

Both the backing and the pile fibers are different in knit and woven fabrics. In simple terms, knitted fabrics have a looped backing, and the pile fibers are secured to the backing with a single pass-through. The resulting fabric is more “open” than a woven, so it can pick up and release more paint for the fastest coverage. Knit rollers are recommended for flat, eggshell, or satin paints and stains.

Woven

Woven fabrics have a backing with a tighter cross section. The pile yarns are made with a twist that helps lock the fibers into the backing, and they are secured using two pass-throughs. This “double lock” process results in a shed-resistant fabric that provides the smoothest, virtually lint-free finish. Woven rollers can be used with confidence in enamels, primers, and all paints: flat, eggshell, satin, semigloss, and gloss.

Q. How do I choose the right cover for the job?

A. For brushes, it's the type of paint that matters (latex or oil). For rollers, it's the sheen (flat to gloss), because the higher the sheen in the paint, the more the surface will show lint from the roller. For semigloss or gloss paint, choose a shed-resistant woven cover. To apply flat, eggshell, or satin paint, a high-capacity knitted cover can be used. For a super-fine finish, it's perfectly okay to use a shed-resistant roller with a flat, eggshell or satin paint, too!

Pro/Doo-Z®

WOVEN

- Shed-resistant for all paints, enamels, primers, urethanes, epoxies
- Proprietary high-density white fabric with a golden pinstripe stays resilient, resists matting for the smoothest professional finish
- Green™ double-thick polypropylene core resists water, solvents, and cracking

R965	61959-4	9"	3/8"	Medium	12

Minis make a big difference.

Minirollers were originally designed just for painting small or confined areas behind radiators and other fixtures. Wooster introduced the Mini-Koter® in 1974 as a traditional rod and weenie roller system. With the advent of our more productive Jumbo-Koter® program in 2002, miniroller usage has evolved. The reliably smooth-spinning cage and lower-cost rollers helped the Wooster Jumbo-Koter system make a significant impact on the industry—now it is the original that so many competitors’ designs are based on!

Make Painting Easier

Their greatest appeal is for small jobs that in the past typically required a brush. Minirollers are lightweight, fast, and easy to use. They’re great for any area with a lot of windows, fixtures, trim, or doorways, resulting in small wall spaces. Keep them in mind for these painting projects.

- Kitchens & baths
- Cabinets & cupboards
- Closets & hallways
- Doors & railings
- Baseboards & mouldings
- Cutting-in & trim work

Painter’s Tip

For a better looking paint job, use a brush to cut-in like you normally do, but follow immediately with a Jumbo-Koter and roll as close as possible to the edge to eliminate any cut-in differences. Then when the rest of the walls are rolled, you see no cut lines or different textures.

Minirollers & Trimmers

Trim Tools & Pad Painters 57–60

Differences Between Jumbo-Koter® & Other Minirollers

Grip

Full-size polypropylene handle, threaded for extension pole use, Sherlock GT® compatible to eliminate twisting.

Shank

Sturdy, chrome-plated 1/4" wire that connects the functioning cage to the grip.

Cage

Precision-engineered to roll smoothly every time, even with heavy materials. Works with all 4½" and 6½" Jumbo-Koter covers!

Roller

Made with the same fabrics as full-size Wooster rollers for a uniform finish. Open 3/4" core makes cleaning easy.

Did you know...

Jumbo-Koter frames work with BOTH 4½" and 6½" Jumbo-Koter minirollers! They are made with the same fabrics as our 9" covers, so using the Jumbo-Koter system in conjunction with full-size Wooster rollers means a flawlessly blended finish.

Typical Minis

Grip

Plastic handle, threaded for extension pole use.

Shank

Traditionally, a galvanized 6mm wire designed to support a 6½" miniroller. Chamfered end for more universal cover fit.

Roller

Made with common fabrics. Built-in 7/16" bearing assembly allows the cover to spin.

Side Nap vs. Button End

Some painters use minirollers to paint corners, where two adjacent walls or the wall and ceiling are the same color. For this, a cover that has fabric wrapped around the end is needed—a side nap or closed end. Other painters want minis that allow them to paint beside a surface of a different color, or an unpainted surface. In that case, a button end creates a cleaner line and provides greater control. Both roller styles are useful.

Jumbo-Koter® Frames

- Solvent-resistant plastic cage, extra-smooth rolling action
- Chrome-plated 1/4" shank
- Full-size polypropylene grip with reinforced threads, Sherlock GT® compatible
- Works with both 4½" and 6½" Jumbo-Koter rollers

Cat. No.	UPC 0-71497-	Length	Shelf Pack
RR013	14422-5	12"	12
RR014	14423-2	27"	12

Jumbo-Koter Shergrip® Frame

- Soft green Shergrip® handle adds comfort; threaded for extension pole use, Sherlock GT compatible
- Solvent-resistant plastic cage, extra-smooth rolling action
- Chrome-plated 1/4" shank
- Works with both 4½" and 6½" Jumbo-Koter rollers

Cat. No.	UPC 0-71497-	Length	Shelf Pack
RR028	17599-1	11"	12

Jumbo-Koter Flip Frame™

- Spring-loaded, 1/4" chrome-plated shank adjusts four ways to reach different faces of a surface; great for cabinets, railings, decks, pipes, and more
- Quickly change the direction of the frame any time during painting by pushing the red button
- Solvent-resistant plastic cage, extra-smooth rolling action
- Full-size grip with reinforced threads, Sherlock GT compatible
- Works with both 4½" and 6½" Jumbo-Koter rollers

Cat. No.	UPC 0-71497-	Shelf Pack
RR323	14607-6	12

Jumbo-Koter Pipe Painter

- Twin roller cages spin smoothly and paint two sides of the pipe simultaneously
- Fully adjustable to paint pipes as small as 1" diameter, as well as railings, posts, I-beams, bridges, and more
- Galvanized 1/4" shanks, polypropylene threaded grip, Sherlock GT compatible
- Works with both 4½" and 6½" Jumbo-Koter rollers

Cat. No.	UPC 0-71497-	Size	Length	Shelf Pack
R212	17649-3	4½"	10"	3

Jumbo-Koter Jr. Frame

- Lightweight but sturdy polypropylene construction
- Solvent-resistant plastic cage, extra-smooth rolling action
- Thumb rest for control, ribbed for easy grip (no threads)
- Works with both 4½" and 6½" Jumbo-Koter rollers

Cat. No.	UPC 0-71497-	Length	Shelf Pack
RR011	16857-3	8½"	12

Jumbo-Koter® Pro/Doo-Z®

- Shed-resistant for the smoothest professional finish with all paints, enamels, primers, and adhesives
- High-density white fabric with a golden pinstripe, exclusively from Wooster, stays resilient, resists matting

Painting goes beyond brushes and rollers.

Without a roller frame, you can't use a paint roller. Extension poles often make an easier (and safer) substitute for ladders. Don't forget trays, buckets, and grids—they get used by painting contractors for every job. Wooster believes the function, durability, and value of these tools that help control the paint are just as important as the tools in the paint, so we've designed them to perform and last.

How to remove a cover from the Sherlock® frame

The Wooster Sherlock frame allows clean, “hands free” cover removal. This is one of the unique features that makes Sherlock the best-selling professional frame in the world.

- 1) Roll excess paint onto the surface or newspapers.
- 2) Grasp the frame handle firmly.
- 3) Rap the neck of the shank inside the 90-degree angle (as shown above) on the edge of a bucket, utility sink, or trash can. On impact, the roller cover will release from the cage.

Painter's Tip

Use trash bags for bucket liners.

Form-fitting liners aren't available for large buckets or trays, so try lining them with a trash bag. Choose a heavy-duty brand (1-mil or thicker), large enough to fit in the bucket and fold down the outside. Use the R007 Wooster Snap Screen™ to “lock” the liner in place. When you're done working, pour the remaining paint back into the original paint can, remove the grid for cleaning, and tie the trash bag shut.

It's easy, and it works.

Painting Equipment

Roller Frames	63–64
12”–18” Roller Frames.....	65

Buckets & Grids	70–71
Prep Crew® Tools	72–75
Dusting & Sanding Tools	76

Roller Frame Components

GT Insert
Black reinforced collar in many Wooster professional tools that has threads for standard extension poles, plus eliminates twisting when used with Sherlock GT® poles.

Extension Pole Parts

Tip Lever
Found only on Sherlock GT poles, it allows tools to be attached and released with just one press of the lever.

Painter's Tip
Try an extension pole for walls. Of course extension poles make roller painting faster and easier for hard-to-reach areas like ceilings. But it's helpful to use an extension handle for painting walls as well! Try a 1- to 2-foot or 2- to 4-foot pole to paint walls with long, sweeping strokes—it saves time and energy because you can use two hands while working.

Sherlock®

- Quick-release retaining spring prevents roller slippage, yet allows easy, one-rap removal
- Smooth-rolling bearings eliminate shank wear and gray streaks
- Durable, green™ fiberglass-reinforced nylon cage and endcaps
- Chrome-plated 5/16" shank, 90° angle

Deluxe Tray Liner 12-Pack

- Contains one dozen R406 liners in a resealable bag
- Form-fitting, resists cracking
- Makes cleanup much easier and extends the life of the tray

Cat. No.	UPC 0-71497-	Size	Fits Tray No.	Shelf Pack
BR496	14947-3	11"	R402 & BR549	12 packs of 12

Deluxe Tray Liner

- Makes cleanup much easier and extends the life of the tray
- Form-fitting, resists cracking
- Made of clear, solvent-resistant PET, a recycled plastic

Cat. No.	UPC 0-71497-	Size	Fits Tray No.	Shelf Pack
R406	64461-9	11"	R402 & BR549	48

Eco Liner™

- Made of unique recycled and biodegradable material, ecologically friendly (paint and/or disposal may impact biodegradability)
- Form-fitting, resists cracking
- Makes cleanup much easier and extends the life of the tray

Cat. No.	UPC 0-71497-	Size	Fits Tray No.	Shelf Pack
BR407	16469-8	11"	R402 & BR549	144

Speed Bucket™

- Useful medium-sized pail quickly works with rollers 7" or smaller
- Powerful magnet inside holds a brush; integrated design won't rust or trap paint for easier cleaning
- Built-in 7½" wide roll-off area; notch keeps a frame in place when not in use
- Durable polypropylene construction resists solvents and paint buildup
- 11½" L x 11¼" W x 8¾" D

Cat. No.	UPC 0-71497-	Working Capacity	Shelf Pack
8617	16259-5	1/2 gallon	4

4-Gallon Bucket

- Built-in 10" wide roll-off area; no-tip design and extra-strong 1/4" galvanized bail with comfort grip
- Durable green™ polypropylene resists solvents and paint buildup
- 13½" L x 15" W x 9" D

Cat. No.	UPC 0-71497-	Working Capacity	Shelf Pack
8616	14315-0	4 gallon	3

Wide Boy™ Bucket

- Built-in 19" wide roll-off area for high-production jobs
- No-tip design and heavy-duty 5/16" galvanized bail with comfort grip for moving when filled
- Durable, seamless, green polypropylene resists solvents and paint buildup
- 14" L x 24" W x 10" D

Cat. No.	UPC 0-71497-	Working Capacity	Shelf Pack
8614	11928-5	5 gallon	3

Bucket Lids

- Protects paint from debris and skim-over, stores paint and tools for days
- Wide Boy Bucket Lid 8624 made of gray, solvent-resistant PET, a recycled plastic
- Wooster 4-Gallon Bucket Lid 8626 made of tan, durable polypropylene, resists solvents and paint buildup

Cat. No.	UPC 0-71497-	Fits Bucket No.	Shelf Pack
8624	13985-6	8614 Wide Boy	6
8626	15407-1	8616 4-Gallon	3

Pelican® Hand-Held Pail & Liner 3-Pack

- Built-in 5½" wide roll-off area; soft-feel elastomer adds comfort
- Powerful, integrated magnet holds a brush; won't rust or trap paint for easier cleaning
- Security strap automatically expands to allow room for larger hands
- Durable polypropylene resists solvents and paint buildup
- 8½" L x 7" W x 6½" D
- Rigid, form-fitting liners are great for quick color changes, disposable for instant cleanup
- Liners made of clear, solvent-resistant PET, a recycled plastic

Cat. No.	UPC 0-71497-	Working Capacity	Shelf Pack
8619	15237-4	1 quart	6
8629 Liner	15238-1	1 quart	18 packs of 3

Snap Screen™

- Snap two together for large trays or buckets
- Durable green™ polypropylene won't rust, resists solvents and paint buildup; open design for easy cleaning
- Excellent for 8614 Wide Boy™ bucket; also fits 8616 Wooster 4-Gallon Bucket or common 5-gallon paint pails
- 10½" L x 10½" W

Cat. No.	UPC 0-71497-	Shelf Pack
R007	14480-5	12

2-Gallon Metal Grid

- Expanded wire with reinforced edges on all sides
- Flat design fits 2-gallon buckets, 9" L x 7½" W

Cat. No.	UPC 0-71497-	Shelf Pack
R003	66618-5	24

1-Gallon Grid

- Paint right from the can with all rollers 4½" or smaller, including Wooster Jumbo-Koter®
- Hooks secure the grid, provide best rolling angle; slot in top holds roller frame grip in place
- Durable green polypropylene won't rust, resists solvents and paint buildup, easy to clean
- Fits all 1-gallon metal paint cans, 9" L x 5" W

Cat. No.	UPC 0-71497-	Shelf Pack
R008	14813-1	12

Mini Roller Grid

- For 1-gallon metal paint cans, 7½" L x 4½" W
- Plastic grid rests inside can to function as a roll-off area

Cat. No.	UPC 0-71497-	Shelf Pack
RR183	15087-5	20

Longneck®

- Unique wraparound knuckle-guard handle protects fingers
- Over 80 yards of wire for maximum performance
- Better angle of attack to reduce fatigue
- Overall 12¼" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1820	11882-0	6" x 1½"	78	1½"	4

Longneck with Scraper

- Two tools in one: dual-position handle attacks brushing or scraping
- Rust-resistant 3" wide steel scraper, permanently locked into the brush
- Over 80 yards of wire for maximum performance
- Overall 13" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1821	11883-7	6" x 1½"	78	1½"	4

Longneck Stainless Steel

- Packed with corrosion-resistant, 100% stainless steel wire
- Excellent for moist or humid conditions; eliminates rust contamination of the surface
- Unique wraparound knuckle-guard handle protects fingers
- Overall 12¼" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1835	12869-0	6" x 1½"	78	1½"	4

Prep-Plane®

- Plane-shaped design for two-handed use, reduces work time
- Angled tip to reach tough spots
- Maximum wire content for aggressive performance
- Overall 10" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1822	11884-4	10" x 1¾"	156	1½"	4

Corner Cleaner®

- Handy, small size with pointed end for hard-to-reach areas
- Full-sized handle, angled to provide more surface clearance
- Thumb rest adds comfort and control
- Overall 10" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1823	11885-1	5" x 1"	64	1½"	4

Corner Cleaner Stainless Steel

- Packed with corrosion-resistant, 100% stainless steel wire
- Excellent for moist or humid conditions; eliminates rust contamination of the surface
- Handy, small size with pointed end for hard-to-reach areas
- Overall 10" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1836	12868-3	5" x 1"	64	1½"	4

Top Brass™

- Packed with non-rusting brass wire, resists corrosion and solvents
- Pliable bristles help avoid scratching
- Handy size reaches small spots
- Overall 8¼" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1833	14826-1	3¼" x 1"	38	1"	8

Little Rhino™

- Two tools in one for heavy-duty performance on railings, window frames, other small spots
- Rust-resistant 1½" wide steel scraper, permanently locked into the brush
- Handy size, easy to carry along
- Overall 9¼" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1834	15239-8	3¼" x 1"	38	1½"	6

Armadillo™

- Bends to conform to round or uneven objects such as pipes, columns, storage tanks, mouldings
- Maintains uniform pressure for faster results, takes stress off the hand
- Flexible yet durable polyethylene block
- Overall 7" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1838	13970-2	7" x 2⅞"	163	1¼"	4

Wire Boss®

- Long handle with knuckle guard gets into hard-to-reach places
- Faster results with two-handed use by applying pressure to the large oval head
- Industrial size with maximum wire content for aggressive performance
- Overall 12" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1824	11932-2	6" x 3 ⁷ / ₈ "	188	1 ¹ / ₈ "	4

Iron Horse™

- Pole-mount brush for use with extension poles, including Sherlock GT®
- Industrial-quality, contains more wire for better performance
- Excellent for surfaces that are often out of reach, such as brick walls, gutters, roofs, and storage tanks
- Overall 8" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1847	15706-5	8" x 2 ¹ / ₂ "	103	1 ¹ / ₈ "	4

Industrial Wire Scrubber™

- Rounded handle reduces fatigue, comfortably fits the hand, and adds control
- Staggered tufts instead of rows provide better coverage, eliminate rake marks
- Overall 7" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1825	11935-3	7" x 2 ⁵ / ₈ "	172	1 ¹ / ₈ "	4

Ergo Wire Scrubber™

- Curved, sander-style handle ergonomically fits the palm and allows users to press down more firmly when scrubbing
- Staggered tufts instead of rows provide better coverage, eliminate rake marks
- Overall 6³/₄" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1818	15227-5	6 ³ / ₄ " x 2 ¹ / ₄ "	88	1 ¹ / ₈ "	4

Straw Boss®

- Packed with naturally strong tampico to hold more liquid yet resist chemicals
- Long handle with knuckle guard gets into hard-to-reach places
- Faster results with two-handed use by applying pressure to the large oval head
- Overall 12" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1827	11886-8	6" x 3 7/8"	60	1 1/4"	4

Work Horse™

- Pole-mount brush for use with extension poles, including Sherlock GT®
- Durable polypropylene bristles maintain stiffness and resist chemicals or solvents
- Excellent for surfaces that are often out of reach, such as siding, roofs, storage tanks, and decks
- Overall 8" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1840	15705-8	8" x 2 1/2"	85	2 1/4"	4

Super Scrubber™

- High-performance mix of two fibers for faster cleaning: tampico holds more liquid, polypropylene remains stiff, resists chemicals and solvents
- Rounded handle reduces fatigue, comfortably fits the hand, and adds control
- Overall 7" length

Cat. No.	UPC 0-71497-	Block Size	No. of Tufts	Trim	Shelf Pack
1828	11887-5	7" x 2 7/8"	68	1 1/2"	4

Sky Scraper®

- Rigid 3" flat blade of 16 gauge rust-resistant steel, beveled edge for precision
- Smooth, ergonomic grip for hand scraping: use flat or turn edgewise for crevices
- Compatible with threaded and Sherlock GT extension poles
- Overall 8 1/2" length

Cat. No.	UPC 0-71497	Shelf Pack
R089	12552-1	4

Dust Eater™

- Specially treated material for powerful, long-lasting pickup
- Attracts and holds dust, cobwebs, and more to clean drywall, ceilings, walls, baseboards, floors
- Unique 16" triangular shape to cover large surfaces and reach into corners
- Stable 360° pivot for full surface contact, won't flip or gouge wall
- Use with extension poles, including Sherlock GT®
- Refill base with the 1805 mop head

Cat. No.	UPC 0-71497	Shelf Pack
1800	16295-3	2
1805 Refill	16836-8	3

AeroSander™

- Reduces drag for highly efficient drywall sanding
- Unique 9½" triangular shape to cover large surfaces and reach into corners
- Stable 360° pivot for full surface contact, won't flip or gouge wall
- VELCRO® brand hook-and-loop fastener for easy changes
- Use with extension poles, including Sherlock GT®, and 1802 or 1803 AeroSander drywall sandpaper or 1807 AeroDuster

Cat. No.	UPC 0-71497	Shelf Pack
1801	16692-0	4

AeroDuster™

- Fits the 1801 AeroSander base
- Specially treated material attracts and holds dust
- Unique 9½" triangular shape reaches into corners
- Great for ceilings, walls, and floors from tile to hardwood
- VELCRO brand hook-and-loop fastener for easy changes

Cat. No.	UPC 0-71497	Shelf Pack
1807	17013-2	4

AeroSander Drywall Sandpaper

- For use with the 1801 AeroSander base
- Works 30% faster compared to conventional drywall sandpaper
- Extremely durable—no slipping, tearing, curling, or clogging
- VELCRO brand hook-and-loop fastener for easy changes
